

SlikTite Soft

FIELD OF APPLICATION

SlikTite Soft is a graphite mudding compound designed for general purpose use with gray and ductile iron. The paste consistency is very soft with lubricant to allow a very smooth application to core and mold surfaces, typical application is for small size sand voids. This product dries to a hard surface without shrinking or cracking.

PRODUCT CHARACTERISTICS

Physical Form	Paste
Paste Penetration (mm)	190 – 215

PROCESSING / NOTES ON USE

As with most mudding compounds SlikTite Soft is designed for hand application to core and mold seams or voids. It has enough lubricity to allow a smearing application without lifting from the core or mold surface.

TRANSPORT AND STORAGE

The shelf life for SlikTite Soft is 90 days. For optimum performance avoid temperature extremes during storage and do not allow to freeze. Partially used containers should be tightly closed to prevent contamination and further evaporation of liquids.

Attention!

HAI does not guarantee a definitive expiration date, as the functional life of many products depends strongly on storage conditions.

HAI recommends the application of FIFO (First In First Out) practices and inventory strategy for all HAI foundry products.

SAFE HANDLING

Chemically resistant gloves and eye protection should be used when handling or using mudding compounds. SlikTite Soft contains petroleum hydrocarbons that may be irritating to skin, eyes and mucous membranes, use of appropriate PPE recommended. Please refer to the Material Safety Data Sheet for additional information.
