

KwikDraw HiFlash

FIELD OF APPLICATION

KwikDraw HiFlash is a low viscosity green sand release agent with a very high flash point hydrocarbon designed for high production molding machines. KwikDraw HiFlash inhibits corrosion of metal patterns.

PRODUCT CHARACTERISTICS

Color	Clear
Flash Point (TCC)	265 F
Odor	Hydrocarbon Solvent
Weight/Gallon (lb)	6.87

PROCESSING / NOTES ON USE

Patterns should be dry and well cleaned of previous release agents, sand and dirt with a cleaning agent. Apply a light film of KwikDraw HiFlash by spraying a mist onto the pattern. Avoid flooding patterns as this will eventually lead to a sticky film build-up. Reapply as necessary.

TRANSPORT AND STORAGE

The shelf life for KwikDraw products is 12 months. KwikDraw HiFlash should be stored away from sources of ignition or sparks and in a location that avoids extremes of temperature. Partially used containers should be tightly closed to prevent contamination and further evaporation of liquid.

Attention!

HAI does not guarantee a definitive expiration date, as the functional life of many products depends strongly on storage conditions.

HAI recommends the application of FIFO (First In First Out) practices and inventory strategy for all HAI foundry products.

PACKAGING

Pail	Drum
